REVOLUTIONARY BLDC TECHNOLOGY

THE POWER BEHIND ATOMBERG FANS

BLDC stands for Brushless Direct Current. The motor runs because of an interaction between a single winding and strong permanent magnets. The commutation is deployed by smart electronics. Thanks to the BLDC inverter technology and our proprietary sensorless algorithm, Atomberg fans consume just 28W at full speed.

ADVANTAGES

- Elimination of friction and associated power losses
- Proprietary algorithm with smart electronics drive that runs the motor efficiently
- Less noise and no motor heating

Power consumption at each speed

The power consumption of the Atomberg Renesa+ fan varies with the speed at which it is set. It consumes less power than an LED bulb at speed 1.
