**ARCHITECTURAL LIGHTING SOLUTIONS**

# ABOUT US

---

**LAFIT LIGHTING** is one of the leading manufacturers in the architectural LED lighting market, featuring a comprehensive catalogue of proven quality, high-reliability lighting fixtures capable of offering industry professionals the most innovative and alternative solutions at all times.

A full range of acclaimed architectural lighting products.

We are proud to be an example of the MADE IN INDIA branding, with a flair for innovation and a profound appreciation of the architectural project. For the last two decades, we have been unstoppable, always focussed on realizing new technical objectives and increasing product performance, with particular attention on our human capital, a team of highly trained, motivated people.

Lafit lighting always involves more resources in Research, Innovation & Design. The products studied and designed at the Research & Development centre by experts are subjected to constant and meticulous Quality.

### **Latest Technology**

The company's manufacturing plant is located in the fast developing industrial area of Vasai & Bhiwandi. Spread across an area of 50,000 sq. ft., it is thoughtfully designed to accommodate the different manufacturing processes while ensuring that every process smoothly synchronizes with the other and there is optimum utilization of time and resources.

The plant is equipped with some of the latest and finest machinery imported from USA, Japan, Italy, Taiwan and China

### **Advanced R&D Facility**

The manufacturing facility also has a well-equipped and highly efficient R&D department. Our R&D team is relentlessly engaged in bettering our current product range through examinations and observations. Any changes in engineering which impact overall performance and productivity are promptly checked and recorded. Further, they also play an instrumental role in shaping our future portfolio through constant monitoring of market trends and customer feedback.

### **Highly Skilled & Qualified Staff**

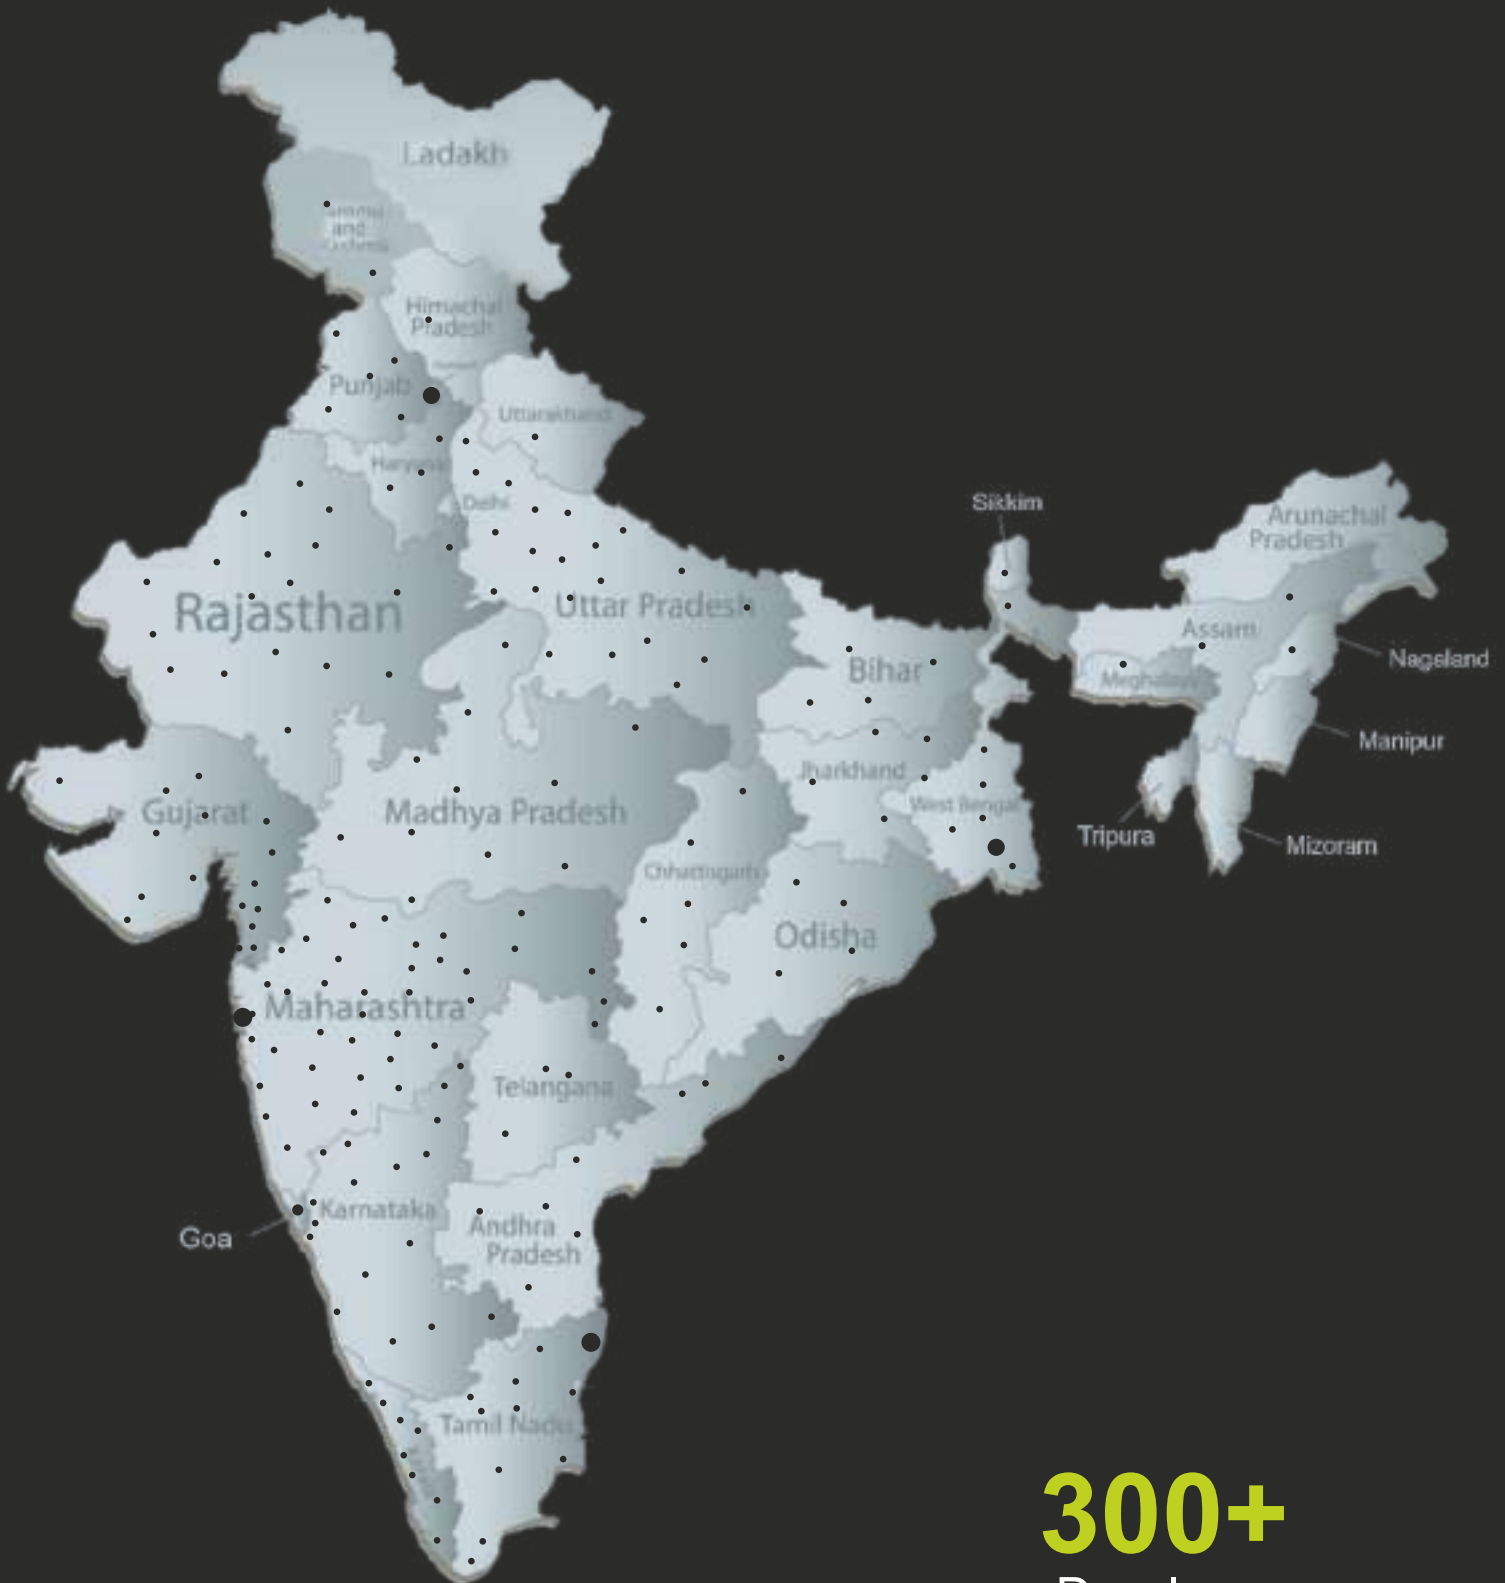

We have a team of highly skilled and qualified professionals with vast experience.

Our team comprises engineers for design, production, QC, and QA. Our team leaders, who head their respective departments, possess considerable in-depth knowledge of the process and its functioning. Further, we also have a team of highly skilled and experienced technical and support staff who are multi-trained to overlook operations and support with maximum fluency and accuracy.

### **Large Warehouse Facility**

We have a well-equipped and professionally managed warehouse facility in Bhiwandi. Being located in the biggest warehousing and transport hub, it is also located at strategically convenient and comparatively close proximity to our manufacturing plant. (Our manufacturing facility & warehouse are the same.) This makes it the most viable location in terms of speed in mobility and cost effectiveness to deliver products within minimum lead-time and at exceptionally competitive prices.

THE  
**SMARTNEXT**

# THE SMARTNEXT

## WHY SMART NEXT ?

For decades, architects, designers, and builders have looked at how to improve aspects of our home & work environment, be it through technology, or functional design. And for the past few decades we have seen an explosion of innovation in residential & workplace technology from the personal computer, cell phone, Internet, and lighting. These advances have helped people be more efficient. But what if we could add a new axis of innovation to the environment? What if in addition to improving the tools in our spaces, we could also improve the productivity of people and at the same time increase efficiency?

Introducing **SMARTNEXT** which functions in sync with the Circadian lighting system. Circadian lighting is the concept that electric light can be used to support human health by minimizing the effect of electric light on the Human circadian rhythm.

### Smart Lighting Functionality

The Lafit Lighting control solution provides for all the control that are expected from a full featured professional lighting control solution.

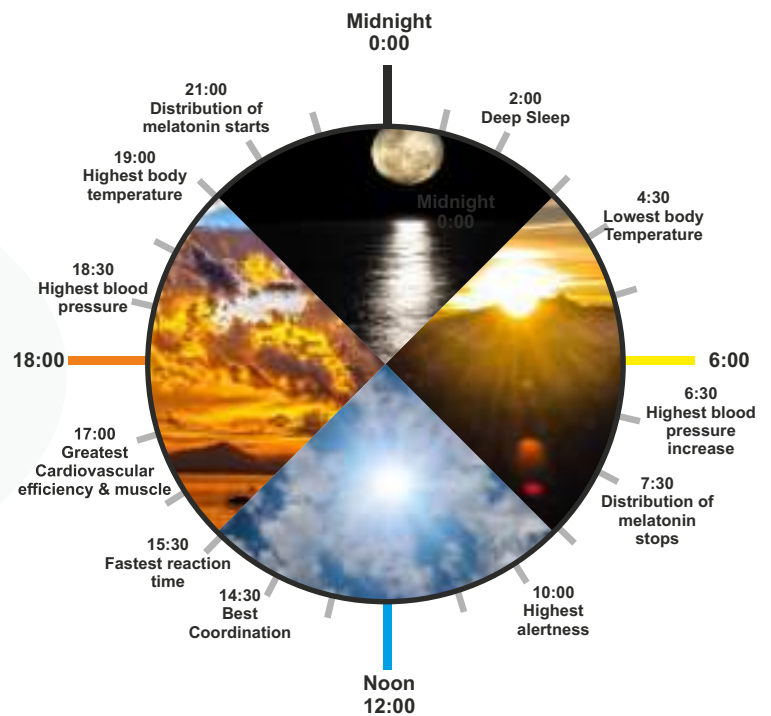

## HUMAN CENTRIC LIGHTING

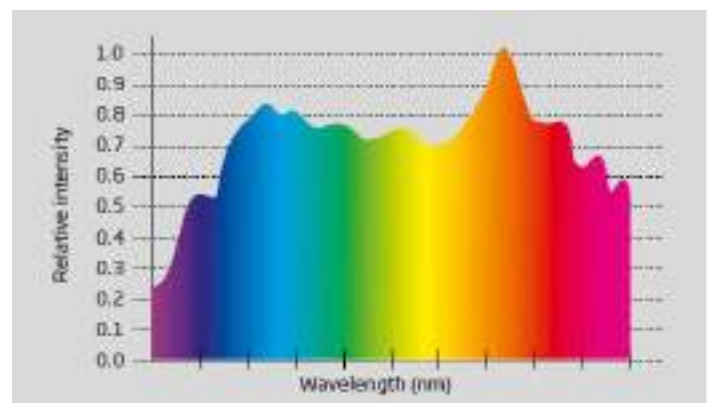

Also known as circadian rhythm lighting, signals the brain through the photoreceptors in the eye and gives the impression of the shifting colors and intensities of the rising and setting sun. What kind of light does an occupant need to perform at optimum levels on an hour to hour basis?

Task tuning is a feature of advanced lighting controls, and human-centric lighting takes this to the next level. Advanced lighting controls using tunable LED lighting that includes color is now driving human physiological responses in a number of important ways.

Exposure to bright, blue-rich white light during the midday and warmer colors during the early morning and late afternoon/ early evening can drive energy and alertness or a calming sleep inducing effect. Disrupting circadian rhythms can contribute to poor night time sleep, increased daytime napping, and greater risk of depression, obesity, diabetes, and seasonal affective disorder. Corporate office buildings, hospitals, and even schools are beginning to see the productivity and other benefits of incorporating human-centric lighting into their environments.

Morning light spectrum

Evening light spectrum

## REACTIONS OF THE BIORHYTHM TO DAYLIGHT For people with normal working & rest periods

# THE SMARTNEXT

With the use of sensor technology, wireless communications, adaptive controls, and software applications, human centric smart lighting systems are environmentally aware and intuitively controllable. Integration with third-party building automation systems and web-based IoT services brings interoperability to HCL systems for vastly improved lighting control, user interaction, energy efficiency as well as automated lighting calibration with the 24-hour biological cycle.

## CIRCADIAN

It's a technology that best imitates sunlight.

Thanks to the use of modern LEDs and the proper configuration of blue light emission, it affects the stimulation or suppression of melatonin release. Therefore, it either gives people energy or helps them wind down and fall asleep, supporting the natural human circadian rhythm.

**ENERGY IN THE MORNING**

4000K white + blue-enriched

**HAPPINESS AT MIDDAY**

4000K - 3000K white

**RELAXATION IN THE EVENING**

3000K - 2700K white

# THE SMARTNEXT

## DAYLIGHT- A NATURAL REGULATOR

Human activity functions according to a rhythm determined by nature. Until the invention of artificial lighting, it was the sun that decided about people's daily activities by waking them up at sunrise and indicating that it was time to rest at sunset.

Evolution has forced a rhythm upon us that divides the day into two parts. We spend 16 hours being active, and the remaining 8 hours resting. This daily activity pattern is determined not only by practicality. Scientific studies prove that a dependency of a chemical nature also exists. Light not only helps us to discover the images coming from the world that surrounds us. It regulates sleep, participates in the absorption and production of vitamins, and takes care of proper hormonal management. What's important, daylight directly affects people's moods and well-being.

In 2001, it was discovered that the eye has three types of photoreceptors, and not two, as had been previously thought: cones and rods. This discovery revolutionized the perception of the significance of the light spectrum and how it affects humans. As it turned out, this third receptor (the ipRGC photoreceptor) is particularly sensitive to a narrow range of blue light, which is most abundant in natural sunlight in the morning and decreases during the day.

When the light enters the eye.

Through the hypothalamus it regulates the circadian rhythm with the help of chemical messengers that include cortisol, serotonin & melatonin.

A regulated circadian rhythm has positive psychological & physiological impacts on you.

## HUMAN-CENTRIC LIGHTING IS THE NEXT STEP IN LED DESIGN AND CONTROL

LED-based human-centric lighting is controllable and tunable across a spectrum of correlated color temperatures (CCTs) to evoke particular human biological responses and behavior in well-designed indoor environments.

### **HUMAN-CENTRIC LIGHTING AT WORK.**

Using tunable LEDs in this manner is known as human-centric lighting (HCL), and it offers many potential advantages in offices and workspaces. Research is underway into the potential emotional and biological outcomes of lighting that mimics the changes in color temperatures found in natural daylight.

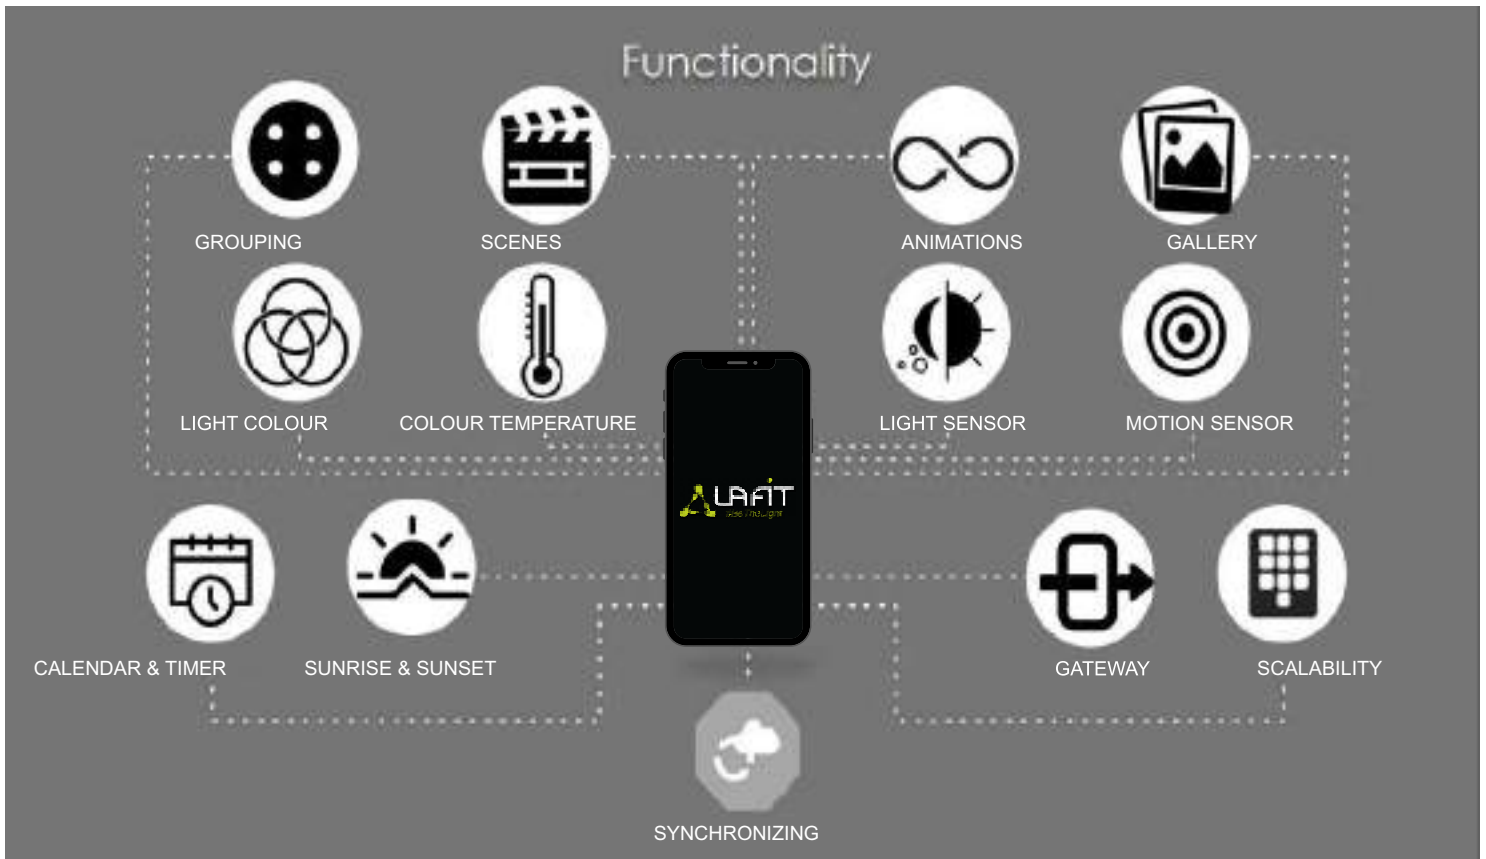

### **THE FUTURE IS SMART NEXT**

The reality is that all light is not created equal. Just as with other products or technologies, there are varying degrees of quality. People will begin to encounter HCL more, and they will soon come to expect it in the spaces where they spend prolonged amounts of time. That means new construction will soon demand this option in the design and specification stage. Also, retrofit opportunities must be available to existing buildings.

The functionalities of this technology are more than merrier. The next page will help you to understand what all it can offer to make your life even more productive and easy at the same time.

# THE SMARTNEXT

## Grouping

Grouping luminaires in the LaFit app is very easy. Grouping works with the same gestures as grouping apps in your smart device. After grouping, all the luminaires in the group can be controlled all together or the group can be opened for individual control.

## Animations

Animations are dynamic scenes, where it is possible for the lighting to fade from one scene to another scene. Animations can be recalled to cycle through different lighting situations once or they can be set on repeat. The duration of each scene and the fade times between scenes can be set.

## Scenes

Different lighting situations for different occasions can be created. It is possible to control multiple luminaires with one tap to create the perfect ambience for different occasions and needs. One luminaire can be used in several scenes.

## Circadian Control

The lighting control solution shall have the capability of controlling the colour temperature of tuneable white luminaires based on day time as well as the ability to automatically change the colour temperature management for regular scenes by using a response graph that spans the hours of day on horizontal axis and colour temperature on vertical axis.

Any user shall have access to the circadian control curve from the App and to be able to modify the curve, by easy App gestures, according to individual needs.

# THE SMARTNEXT

## Light colour

Lafit offers a comprehensive color controlling possibility. A luminaire manufacturer can define the limits of the Lafit Ready luminaire's color range beforehand. A user can change the color in a simple manner from the app and also save his/her favorite colors in a color palette.

## Calendar & timer

With the calendar and timer functionality scenes and animations can be turned on and off based on a convenient time, date or certain weekdays to fit users' needs, seasons and different activities. All the Lafit units keep track of time.

## Sunrise & Sunset

Lafit units are able to calculate the local sunrise and sunset times, provided that the network's time zone and location are set. When the location is requested the application is temporarily using GPS to retrieve the current location of the mobile device.

## Colour temperature

Lafit offers a comprehensive colour temperature control. A luminaire manufacturer can define the limits of the Lafit ready Tunable White luminaire beforehand so it appears with the correct levels in the Lafit App. A user can change in a simple manner the colour temperature for the luminaire just by sliding the finger on top of a luminaire icon.

## Gallery

The lighting control solution shall include a functionality to control lighting directly from a picture in the App. The functionality shall be flexible and permit the user to choose any kind of picture like a real photograph of the space, a floor plan or a render. It shall be possible to control lighting from the chosen picture with easy App gestures. Several pictures can be added.

## Remote Access

A network can have a single iOS/Android device working as a gateway. Other devices having access privileges to the same network can connect via the cloud to the network when not on the same physical location of the network. One iOS device can be a gateway for 4 networks and one Android device can be the gateway for 1-4 networks, depending on the Android device. The amounts of networks are iOS/Android restrictions and not depending on the lighting control solution technology.

## Apple watch

The lighting control solution shall enable lighting control via Apple Watches. From an Apple Watch, luminaires can be turned on and turned off, a scene or an animation can be recalled and dimming can be done by rotating the digital crown. In the watch window 'all lamps' and 3 first scenes can be seen.

# THE SMARTNEXT

## No Gateway

Bluetooth Low Energy is already implemented in smartphones, tablets and smart watches. This means that the communication from a smart device to the lighting control solution shall not require any kind of gateway or dongle.

## App

The lighting control solution shall offer a big variety of possibilities for a user to interact with the lighting depending on the user's individual requirements. An App for smartphones, tablets and smartwatches is the most elaborated user interface. It shall be possible to download the App, with all the functionality specified for the project, for both iOS and Android devices, from relevant App stores.

## Network Sharing

As a consideration of the system setup, the network sharing is a decision that is to be made at the beginning of the process, to ensure a straightforward commissioning phase and the best possible network security. The network shall have 4 different sharing options, that can be chosen and modified directly from the App.

## Network

The lighting control solution is based on a network structure. All luminaires and lighting control devices are paired to networks. 250 units can be paired to one network. The amount of networks does not have to be considered.

## Security

The network (communication from mobile devices to the lighting control units and from the units to the cloud and server) shall be an own, closed network. Local building networks shall not be accessed. The cloud shall require Log In and Password, that allows an access token to a local "Bluetooth network".

## SIMULATION OF DAYLIGHT

The characteristics of the Human Centric Lighting illumination consider more than just vision. The focus is on the person. Human Centric Lighting stimulates the well-being and supports stable health of the person.

## THE SMARTNEXT

DELIVERING NEXT

THE SOLUTION FOR HUMAN CENTRIC LIGHTING

# THE SMARTNEXT

## KEY FACTORS

- Bluetooth Low Energy, wireless.
- Any smartphone or tablet in the world support BLE technology.
- Mesh peer-to-peer communication.
- Mesh network range : 30 m range indoor, 50 m range outdoor. (Without obstacle)
- 250 smart modules in one network with an end number of networks can be created at one site.
- Each Lafit Bluetooth unit works as amplifier/repeater.
- No servers, no software licenses, no IT structure needed.
- Firmware updates over the air.
- 100% Safe & Secure for your mobile data.
- Secure communication: AES-128, (+ECDH and ECDSA), cryptography in the BLE level and Secure https communication between smartphone and the cloud.
- No VPN/gateway needed for remote control.
- Easy, user friendly app-interface.
- Five levels of security/users.
- Compatible with standards: DALI,
- 0/10V Analog, 1/10V Analog and trailing edge.
- No single point of failure, no need of HUB/Router's.
- Self repairing: each Lafit Bluetooth module stores a backup of all Lafit Bluetooth module in the network.
- Restore/auto backup of the failure units.
- Unlimited number of networks.
- Cloud supported. No need for local backup.
- Data harvesting and Cloud/API interface for IoT.
- Our Brillo range products, are 100% compatible with app & all products are configured and used with the Casambi App, available for both iOS & Android.

## TRAVEL UVC SANITIZING WAND

### INTRODUCTION

The Travel UV Sanitizing Wand provides effective protection from germs, viruses, bacteria, dust mites and mold throughout your home. Used regularly on surfaces throughout your home to disinfect (in addition to regular cleaning of bedding, floors and other surfaces), it will protect your home without the use of sprays or harsh chemicals.

Size	10.4" L x 1.6" W x 1.5" H
Weight:	0.3 lbs.
UV-C Lamp	3W DC Lamp
UV Wavelength	UV-C (253.7nm)
Power Supply	Alkaline Batteries (4 X AA)

### ADVANTAGES

- Naturally eliminates germs that cause colds, infections, asthma and allergic reactions.
- Destroyed over 99.9% of E. coli in laboratory tests.
- Chemical-free.
- Odorless.
- No harmful residue.
- A hypoallergenic way to disinfect kitchen surfaces and utensils, beds, sofas, children's toys and more.
- Safe and easy to use.
- Silent operation.

E. Coli

Bacteria

Virus

Dust Mite

**Do not expose eyes or skin directly to UV-C light. Keep this device out of the reach of children at all times.**

## UVC DISINFECTION TABLE LAMP

**38W UV+Ozone Disinfection lamp Quartz Sterilizer Bulb 230V AC Household  
Ultraviolet Lamps UVC Germicidal Light Sterilizing**

### Specifications

Material: ABS + tube quartz  
Rated power: 38W  
Rated voltage: 230VAC  
Rated frequency: 50HZ  
Colour: White  
Weight: 1100g

### Product

Life time : >5000 hours  
size: 210 \* 110 \* 460MM  
Timing mode: remote timing  
Wave length : 185nm  
Effective sterilization area: 40 square meters

### Features

1. Sterilization, disinfection, and removal of mites.
2. UV + ozone has no dead corner sterilization.
3. Purified air, remote control through the wall, timing control.
4. Suitable for various occasions: home, school, hospital, restaurant.

### Application :

In home, school, office, etc.,

Ozone has a strong oxidizing effect, which can effectively kill bacteria. The dispensability of ozone can just make up for the shortcomings of ultraviolet rays that only spread in a straight line and disinfection. However, after ozone disinfection, windows must be opened to ventilate the ozone before it can enter. After sterilization, people can enter the room immediately, but the ultraviolet light only spreads in a straight line, and there is a dead angle in disinfection.

When using UV products.  
Human, animals and plants must leave the scene.  
After disinfection, Ventilate for about 40 minutes before entering the room !!!

**LEAVE THE SCENE**

SOLUTION

IMPORTED & MARKETED BY

**We are proud to define ourselves as an Authorised Distributor of Fumagalli in INDIA.**

"Fumagalli - A worldwide leading company in the manufacturing of resin material outdoor lightings."

Fumagalli products are strictly manufactured at their factory located in Varese (Italy), enabling to have full control about the quality and performance of all products.

#### **About Us:**

Lafit Lighting is one of the leading manufacturers in the architectural lighting market, featuring a comprehensive catalogue of proven quality, high-reliability lighting fixtures capable of offering the industry professionals the most innovative and alternative solutions at all times.

A full range of acclaimed architectural lighting products.

For the last two decades, we have been unstoppable, always focused on realizing new technical objectives and increasing product performance, with particular attention on our human capital, a team of highly trained, motivated people.

Lafit lighting always involves more resources in Research, Innovation & Design.

The products studied and designed at Research & Development centre by experts subject to constant and meticulous quality.

Our products can meet the multiple needs of the architectural and design studies and the most demanding and refined customers. The business philosophy is the same Lafit Lighting have always done: Design and Delivery of the whole system not the individual product.

Our goal has always been to offer our customers a first-class product backed by unparalleled service, focused on solving our client's illumination challenges.

#### **SEGMENTS WE TAKE CARE OF**

- Architectural Lighting

## FUMATECH

### FUMAGALLI POLES TECHNOLOGY

Fumagalli created and developed a unique post technology, registered as FUMATECH. Fumatech technology grants to our lamps the same strength features of a metal post, combined with all the advantages in terms of rust and corrosion resistance that only a resin material can offer.

L'azienda Fumagalli ha creato e sviluppato un'esclusiva tecnologia per la fabbricazione dei pali, registrata come FUMATECH. La tecnologia FUMATECH assicura alle nostre lampade le medesime caratteristiche di solidità di un palo in metallo, con tutti i vantaggi in termini di resistenza alla ruggine e alla corrosione che solo la resina può offrire.

## METAL POST COVERED BY RESIN

**46 YEARS  
EXPERIENCE**

- ✓ Protected against corrosion.  
*Inattaccabile dalla corrosione.*
- ✓ Not-fading colours (UV-rays stabilized).  
*Colori inalterati nel tempo (stabilizzati ai raggi UV).*
- ✓ Double insulated.  
*Doppio isolamento.*
- ✓ Rigid and shockproof.  
*Rigido e resistente agli urti.*
- ✓ Fireproof.  
*Ignifugo.*
- ✓ Light and easy to transport.  
*Leggero e facile da trasportare.*
- ✓ Manufactured according to European Community's standards.  
*Fabbricato secondo le norme della Comunità Europea.*
- ✓ High quality resin polymer sourced in Europe.  
*Resina polimerica di alta qualità fabbricata in Europa.*

### 1 INNER METAL POLE STRUCTURE

Structural metal pole hot deep galvanized inside and outside by zinc bath immersion.

### 2 OUTER RESIN COVER

Outer coating of a single piece without joints made of shockproof resin material:

- Rust and corrosion-free
- Paste molded colors, UV stabilized
- Self-extinguishing on fire

### 3 EXPANSE

High Density rigid polyurethane provides lightweight and durable cohesion between the inner metal post and the outer resin cover.

### ANTI CORROSION

Thanks to the outer resin material, Fumagalli lamps are protected against rust and corrosion, even if subjected to saline or polluted environments.  
*Grazie alla resina esterna le lampade Fumagalli sono protette da ruggine e corrosione, anche se esposte ad ambienti salini o inquinati.*

### NO MAINTENANCE

The colour of the outer resin coating is molded in the paste of material to grant the maximum durability over the time. No re-painting will ever be necessary.  
*Il colore della resina esterna è nella pasta stessa del materiale, per garantire la massima durata nel tempo. Non sarà più necessaria alcuna riverniciatura.*

### UV-RAYS STABILIZED

Fumagalli products are made of UV stabilized materials to avoid color fading of the outer surface under the sun. Ideal in hot and cold climate.  
*I prodotti Fumagalli sono realizzati con materiali stabilizzati agli UV per evitare che il colore della superficie esterna sbiadisca con il sole.*

### SAFE

CLASS II

The outer resin coating of Fumagalli products isolates the lamp from electrical discharges (double insulation Class II).

*Il rivestimento esterno dei prodotti Fumagalli rende la lampada isolata dalle scariche elettriche (doppio isolamento Classe II).*

### UNAFFECTED BY CHEMICAL FERTILIZERS

Fumagalli lamps are not affected by chemical fertilizer or pollutants.

*Le lampade Fumagalli non sono soggette a deterioramento dovuto a fertilizzanti chimici ed agenti inquinanti.*

# FOUNDATION

## CLASSIC POST - FOUNDATION SYSTEM

### SUGGESTED SIZES FOR CONCRETE FOUNDATION

All Fumagalli poles are supplied with suitable cages for fixing into concrete foundations. The size of the cages and the size of the concrete foundation varies according to the high of the post.

The fixation system with two triangles allows the anchor bolts to be cemented perpendicularly to the ground. The second triangle has to be removed before installing the pole.

**CLASSIC POST COLLECTION**

Each post is supplied with the suitable cage or screws for fixation.  
Colours available for the CLASSIC range are the following:

Moulded colours: **Black - White**  
Painted Colours: **Antique Green - Antique Bronze**

## CLASSIC POST TOP SYSTEM

FULLY MODULAR

All the connection hubs of FUMAGALLI poles and lanterns have a Diameter of 60 mm;  
This unique feature allows many different possible combinations of complete lamps with the same components, for a big stock flexibility.

## **MODERN POSTS**

### OUR COLLECTION

MODERN lighting poles of a single piece without joints, made of shockproof composite material (steel-expansive-resin), UV-rays stabilized, rust and corrosion-free. Insulation class II. Moulded colours in paste, no maintenance or painting required. Insulation class II. Available in many design options and different sizes from 0,7mt up to 6mt high. Provided with suitable cage for ground fixation.

## MODERN POST TOP SYSTEMS

### FULLY MODULAR

All the connection hubs of FUMAGALLI poles and lanterns have a diameter of 60 mm; this unique feature allows many different possible combinations of complete lamps with the same components, for a big stock flexibility.

**ADVANTAGES**

ANTI RUST  
**LIFE TIME GUARANTEE**  
NO PAINTING REQUIRED  
MADE IN ITALY

**ANTI CORROSION**

**NO MAINTAINANCE**

**UV RAYS STABILIZED**

**DOUBLE INSULATION**

**NOT AFFECTED BY CHEMICAL FERTILIZES**

**Ø60mm**

**FULLY MODULAR**

**SUGGESTED COMBINATION**

**RESIN POST OF A SINGLE PIECE WITHOUT JOINTS**  
Stronger, safer and more durable

**INNER METAL POLE STRUCTURE**  
Structural metal pole hot deep galvanized inside and outside by zinc bath immersion.

**EXPANSE**  
High Density rigid polyurethane provides lightweight and durable cohesion between the inner metal post and the outer resin cover.

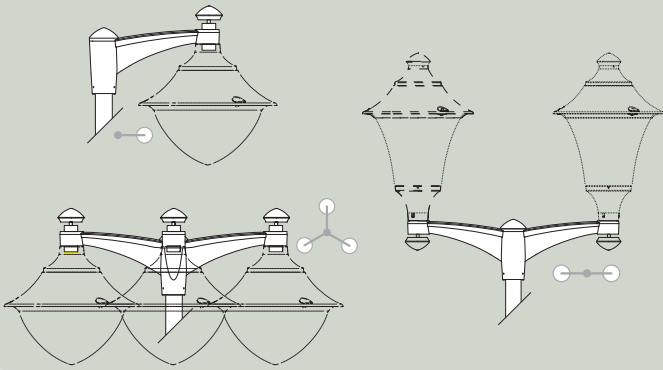

**OUTER RESIN COVER**  
Outer coating of a single piece without joints made of shockproof resin material:  
- Rust and corrosion-free  
- Paste molded colors, UV stabilized  
- Self-extinguishing on fire

## MODULAR SYSTEM

### FUMAGALLI LED LAMPS

#### MODULAR SYSTEM

Innovative **TÜV certified LED lamps** with standard E27, GX53 or GU10 lamp holder to get a very efficient LED lighting system. Heatsink and driver are built-in the lamps. LED modules can be easily replaced without the help a qualified technician. Available in different wattage versions and color temperature. Moreover combing in series Fumagalli GX53 lamps you get a powerful and efficient public lighting system both on classic and modern luminaries.

#### BENEFITS:

- **COST SAVING:** long-life and efficient LED light sources.
- **BUILT-IN DRIVER:** quick and easy lamp replacement.
- **GREAT FLEXIBILITY:** standard lamp holder.
- **FUTURE-PROOFED LUMINARIES:** performances easy to upgrade to latest technology devel,
- **SUITABLE FOR OUTDOOR USE:** driver fully protected against heat and humidity by silicone p
- **TUV CERTIFIED QUALITY:** Production monitored, CE marked, LVD and EMC tested, in compliance with the European Ecodesign Directive (ERP).

## TUV CERTIFIED MODULES

### Power surges resistant

- **Wide voltage range (100-240V)** to protect the driver both from voltage droop and voltage overshoot, which are quite frequent in case of outdoor installations.
- **Double 400V capacitors** and multiple resistances to withstand power surges.
- **Silicone paste** to avoid — in case of voltage swings- the vibration of the electronic components of the driver and the consequent risk of components unsoldering.

### Heat resistant - Working temperature -30°+80°C

- **Gold wire bonding:** Chips connected by pure gold wires, which are able to withstand at the highest and lowest temperatures and at temperature fluctuations between day and night. The gold wire bonding can grant a lumens maintenance factor > 80%.
- **Silicone paste:** Thermoconductive silicone paste with metal powder inside for helping heat dissipation and avoid overheating problems and for protecting the electronic components in case of high and low temperatures.

### Humidity resistant - Weatherproof driver for a longer lifetime

- **Silicone paste:** The driver is fully enclosed in a special silicone paste, which ensures the highest driver protection against moisture and humidity up to 90%, both unavoidable in outdoor installations.

Tested according to :  
 EN 62560:2012/A1: 2015  
 IEC/TR 62778:2014  
 EN 62493:2015

**LVD**  
TESTED

**LVD Certificate:** Fumagalli lamps fulfil the Low Voltage Directive 2014/35/EU, therefore are CE marked and comply with safety requirements like protection against electrical shock, moisture and heat resistance, resistance to flame and ignition.

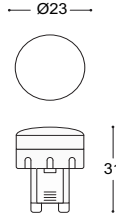

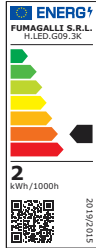

**EMC**  
TESTED

**EMC Certificate:** Fumagalli lamps meet the Electromagnetic Compatibility Directive 2014/30/EU

**ERP**  
6000 h

**ERP Attestation of conformity:** Fumagalli lamps fulfil the European Ecodesign Directive 2009/125/EC about the energy performance requirements of energy related products.
